

ENGAGING WITH THE LITERATURE ON TEACHING AND LEARNING

by David J. Voelker

Associate Professor of Humanities and History
University of Wisconsin–Green Bay

Doing research on teaching and learning is a scholarly endeavor, which means not only gathering and analyzing evidence in a rigorous fashion but also studying the scholarly literature in the field. Engaging with the relevant literature early and often will help you develop a meaningful question and effective methodology. I deliberately use the phrase “engaging with the literature” rather than “conducting a literature review” because the latter sounds like a discrete step that can be completed and “checked off” at the beginning of a project. I recommend that you begin reviewing the literature while you are formulating and refining your research question and continue to explore the literature as you define your research methods and analyze the evidence that you collect.

If you are just getting started doing SoTL, you will find it very useful to read a few foundational works on teaching, learning, and course design. I have marked several books and articles with an asterisk (*) to flag them as essential reading. These works discuss key pedagogical theories and principles that you can use to help frame a research question.

Quick-Start Tips:

1. Locate and search the major journal(s) on teaching and learning for your discipline.
2. Read chapter(s) on your discipline (and related disciplines) in *Exploring Signature Pedagogies* and *Exploring More Signature Pedagogies* (cited below under Disciplinary and Multidisciplinary SoTL).
3. Browse and search *Teaching & Learning Inquiry (TLI)* and the *International Journal for the Scholarship of Teaching and Learning (IJSOTL)* (both are open access).
4. Utilize one or more of the “Foundational Works and Learning Theories” publications below to establish a guiding framework (e.g., threshold concepts) for your project.

Teaching, Learning, and Course Design: Foundational Works and Learning Theories

*Ambrose, Susan A., et al. *How Learning Works: Seven Research-Based Principles for Smart Teaching*. San Francisco: Jossey-Bass, 2010. Each chapter is devoted to a particular learning principle and includes a set of specific strategies for teaching and assessing with that principle in mind. For a brief overview, see: <http://tinyurl.com/ycraobu>.

Anderson, Lorin W., et al., eds. *A Taxonomy for Learning, Teaching, and Assessing: A Revision of Bloom’s Taxonomy of Educational Objectives*. Abridged ed. New York: Longman, 2001. This revision of Bloom’s classic taxonomy divides learning into several “process categories”—remember, understand, apply, analyze, evaluate, and create—and “knowledge dimensions”: factual, conceptual, procedural, and meta-cognitive. Helpful for define learning outcomes.

*Bain, Ken. *What the Best College Teachers Do*. Cambridge: Harvard Univ. Press, 2004. Offers an analysis not of teaching techniques but of how successful college teachers conceive of their work as teachers and structure the learning experiences of their students.

Berila, Beth. *Integrating Mindfulness Into Anti-Oppression Pedagogy: Social Justice in Higher Education*. New York: Routledge, 2016.

Bransford, John D., Ann L. Brown, and Rodney R. Cocking, eds. *How People Learn: Brain, Mind, Experience, and School*, expanded ed. Washington, D.C.: National Academy Press, 2000. An accessible introduction to "the science of learning."

*Davis, James R. Bridget D. Arend. *Seven Ways of Facilitating Learning: A Resource for More Purposeful, Effective, and Enjoyable College Teaching*. Sterling, VA: Stylus Publishing, 2013.

Fink, Dee L. *Creating Significant Learning Experiences: An Integrated Approach to Designing College Courses*. San Francisco: Jossey-Bass, 2003.

King, Patricia M. and Karen S. Kitchener. "The Reflective Judgment Model." An overview of King and Kitchener's research-based developmental model of how students develop critical thinking and reflective judgment. <http://www.umich.edu/~refjudg/>

Lang, James M. *Small Teaching: Everyday Lessons from the Science of Learning*. San Francisco: Jossey-Bass, 2016.

McGuire, Saunda Yancy. *Teach Students How to Learn: Strategies You Can Incorporate Into Any Course to Improve Student Metacognition, Study Skills, and Motivation*. Sterling, Virginia: Stylus Publishing, 2015.

Meyer, Jan, and Ray Land, "Threshold Concepts and Troublesome Knowledge: Linkages to Ways of Thinking and Practising within the Disciplines," *Occasional Report 4* (May 2003). <http://tinyurl.com/cq2zxyk>

*Verschelden, Cia. *Bandwidth Recovery: Helping Students Reclaim Cognitive Resources Lost to Poverty, Racism, and Social Marginalization*. Sterling, Virginia: Stylus Publishing, 2017.

*Wiggins, Grant and Jay McTighe, *Understanding by Design*, 2nd ed. Upper Saddle River, NJ: Pearson Education, 2006. Although this book is burdened with an apparatus of acronyms and rubrics, its discussion of understanding and "backward design" is essential reading.

The Scholarship of Teaching and Learning: Research Methods

Berk, Ronald A. *Thirteen Strategies to Measure College Teaching*. Sterling, Virginia: Stylus Publishing, 2006.

*Bishop-Clark, Cathy and Beth Dietz-Uhler, *Engaging in the Scholarship of Teaching and Learning: A Guide to the Process, and How to Develop a Project from Start to Finish*. Sterling, Virginia: Stylus, 2012. Very good introduction to the process and methods of doing SoTL work. Includes many useful examples, worksheets, and citations.

Bloch-Schulman, Stephen, et al. "Asking Bigger Questions: An Invitation to Further Conversation." *Teaching & Learning Inquiry* (2016): 4 (1). Argues in favor of humanistic approaches to SoTL research.

Cerbin, Bill. *Lesson Study: Using Classroom Inquiry to Improve Teaching and Learning in Higher Education*. Sterling, Virginia: Stylus, 2011. Great guide to collaborative lesson study.
